

Where are you currently in your digital delivery journey?

Rank these priorities for *industry involvement* in digital delivery (referring to non-governmental stakeholders)

Rank these first-year goals for the Digital Delivery Stakeholder Group (DDSG) based on their importance to advancing national digital delivery efforts

Rank the primary drivers for Digital Delivery within your organization.

Rank the top barriers your organization faces with Digital Delivery:

Wrap Up

I took away something new

I understand the role of the DDSG and it's goals for advancing Digital Delivery

Strongly disagree

Strongly agree

Thoughts or Comments on today's meeting?

Thank you. Great conversations and presentations

Reiterate role based training and keeping it simple. All roles (e.g. construction, plan review - project managers, project delivery, speciality offices (concrete, bituminous, etc.), estimating, adv ...

What would make future DDSG meetings worth your time?"

An invite. Oregon needs to make progress in Digital Delivery

Discussion of organizational approaches / structures
State DOTs have taken to better advance digital delivery.

Making sure to continue to collect input from non-DDSG states.

For previous question, help ensure that trying to get things "perfect" doesn't slow down progress.

Less general updates and more breakouts and interactivity (not just mentimeter)

Make an effort to consolidate input and reference existing standards

I like the pooled fund study report-outs. Maybe look for people to give practical real-world examples of implementation. Little step of implementation.

Actionable outcomes

What would compel you to participate in future meetings of the DDSG?

If I felt I was able to contribute and not just listen

Engineers and GIS people definitely need to work together!

An invite. I will also work on expanding ODOT participation.

Focus on use cases within our control or where the domain experts are reaching out to collaborate. We need to address real needs and not things we think are cool but are outside of our control.

Interaction to determine actions needed from and for other efforts.
