

Fall 2026 In-Person Meeting

Dates: September 29 to 30, 2026 (in-person and virtual each day)

Location: National Highway Institute (NHI)

2600 Park Tower Drive, Suite 500, Vienna, VA 22180

Zoom online (meeting coordinates to follow)

Times: All times Eastern

Tuesday, September 29: 8:00 a.m. to 4:30 p.m.

Wednesday, September 30: 8:00 a.m. to 4:30 p.m.

Overview

The Federal Highway Administration's (FHWA) Digital Delivery Stakeholder Group (DDSG) will hold its Fall 2026 meeting both in-person and virtually across two days in September. This meeting will bring together transportation leaders, state DOT representatives, federal partners, and industry experts to advance the national conversation on digital delivery, open standards, and the future of interoperable transportation data.

These two full-day sessions are designed to maximize participation and collaboration in a hybrid setting. As with all DDSG meetings, this gathering is free and open to all interested parties, though registration is required. We hope you will join us.

What to Expect

During the hybrid stakeholder meeting, attendees will have the opportunity to receive updates, ask questions, and participate in discussions on the following topics:

- Updates from industry organization members on digital delivery positions and activities at the international, national, and local levels.
- Discussion of DDSG plans, upcoming workshops, schedules, and topics.
- Updates on current research projects from FHWA and the National Cooperative Highway Research Program (NCHRP) relevant to the DDSG community.
- Workshop on libraries and dictionaries, including the Central BIM Transportation Library (CBTL) and how it can support state DOT library needs, along with sharing of library and dictionary efforts at state DOTs and Pooled Funds.
- A continuation of the Information Management Process Workshop from the Spring 2026 meeting, with updates from Arizona and Oklahoma DOT and sharing from other states on their IM Process standardization efforts.
- Workshop on software and technology used by states with ADCMS grant-driven pilot projects, showing what works and what is still needed.

A detailed agenda identifying topics and speakers for each day will be posted on the DDSG Hub soon.

Who Should Attend

- State DOT leaders in digital delivery, CAD/BIM, GIS, surveying, construction, and asset management.
- Federal agency partners and program managers.
- AASHTO committee representatives.
- Technology and industry collaborators supporting digital project delivery.

Why Attend

This meeting offers a unique opportunity to:

- Connect with peers working at the forefront of digital delivery.
- Contribute to the development of national frameworks and shared resources.
- Stay informed on evolving federal priorities, open standards initiatives, and interoperability strategies.
- Influence the direction of future DDSG activities and collaboration models.

Registration

Attendance is free and open to DDSG members, stakeholders, and any industry professionals interested in advancing digital delivery in the built environment.

Registration is available now on the [DDSG Hub](#). Be sure to register for all events and download the calendar invitations to add the sessions directly to your schedule.

Venue and Accommodations

The two-day workshop will be held at the FHWA National Highway Institute, located at 2600 Park Tower Drive, Suite 500, Vienna, VA 22180. A room block for in-person attendees has been secured at the Courtyard by Marriott Dunn Loring Fairfax, located close to the NHI. Hybrid meeting details will be made available when registration opens.
